

Posting Bios for VCAS Foster Animals

Adult Dogs & Cats:

We ask our foster parents to send in bios for their foster animals within one week of taking them home. Simply send an email to VCAR.FOSTER@VENTURA.ORG with your foster animal's bio in the body of the email. The Subject line of the email should contain your foster animal's animal ID number (A#). If your foster animal did not come to you with a name, and you have named it, please indicate this in your email. If you need help writing a good bio for your foster dog or cat, please refer to the Foster Marketing Guide on the foster resources website for tips and examples!

Kittens & Puppies:

When your kittens or puppies reach 5 weeks of age the bios are due. Kittens and puppies only need a few sentences in their bios. Simply send an email to VCAR.FOSTER@VENTURA.ORG with your foster animal's bio in the body of the email. The Subject line of the email should contain your foster animal's animal ID number (A#). If your foster animal did not come to you with a name, and you have named it, please indicate this in your email. If you are placing your foster kittens in a store and DO NOT wish to be emailed by potential adopters, please indicate that in your email by adding the words "store placement" to the subject line along with the A#.
